

Detecting Equal-Cost Multi-Path (ECMP) using Anycast

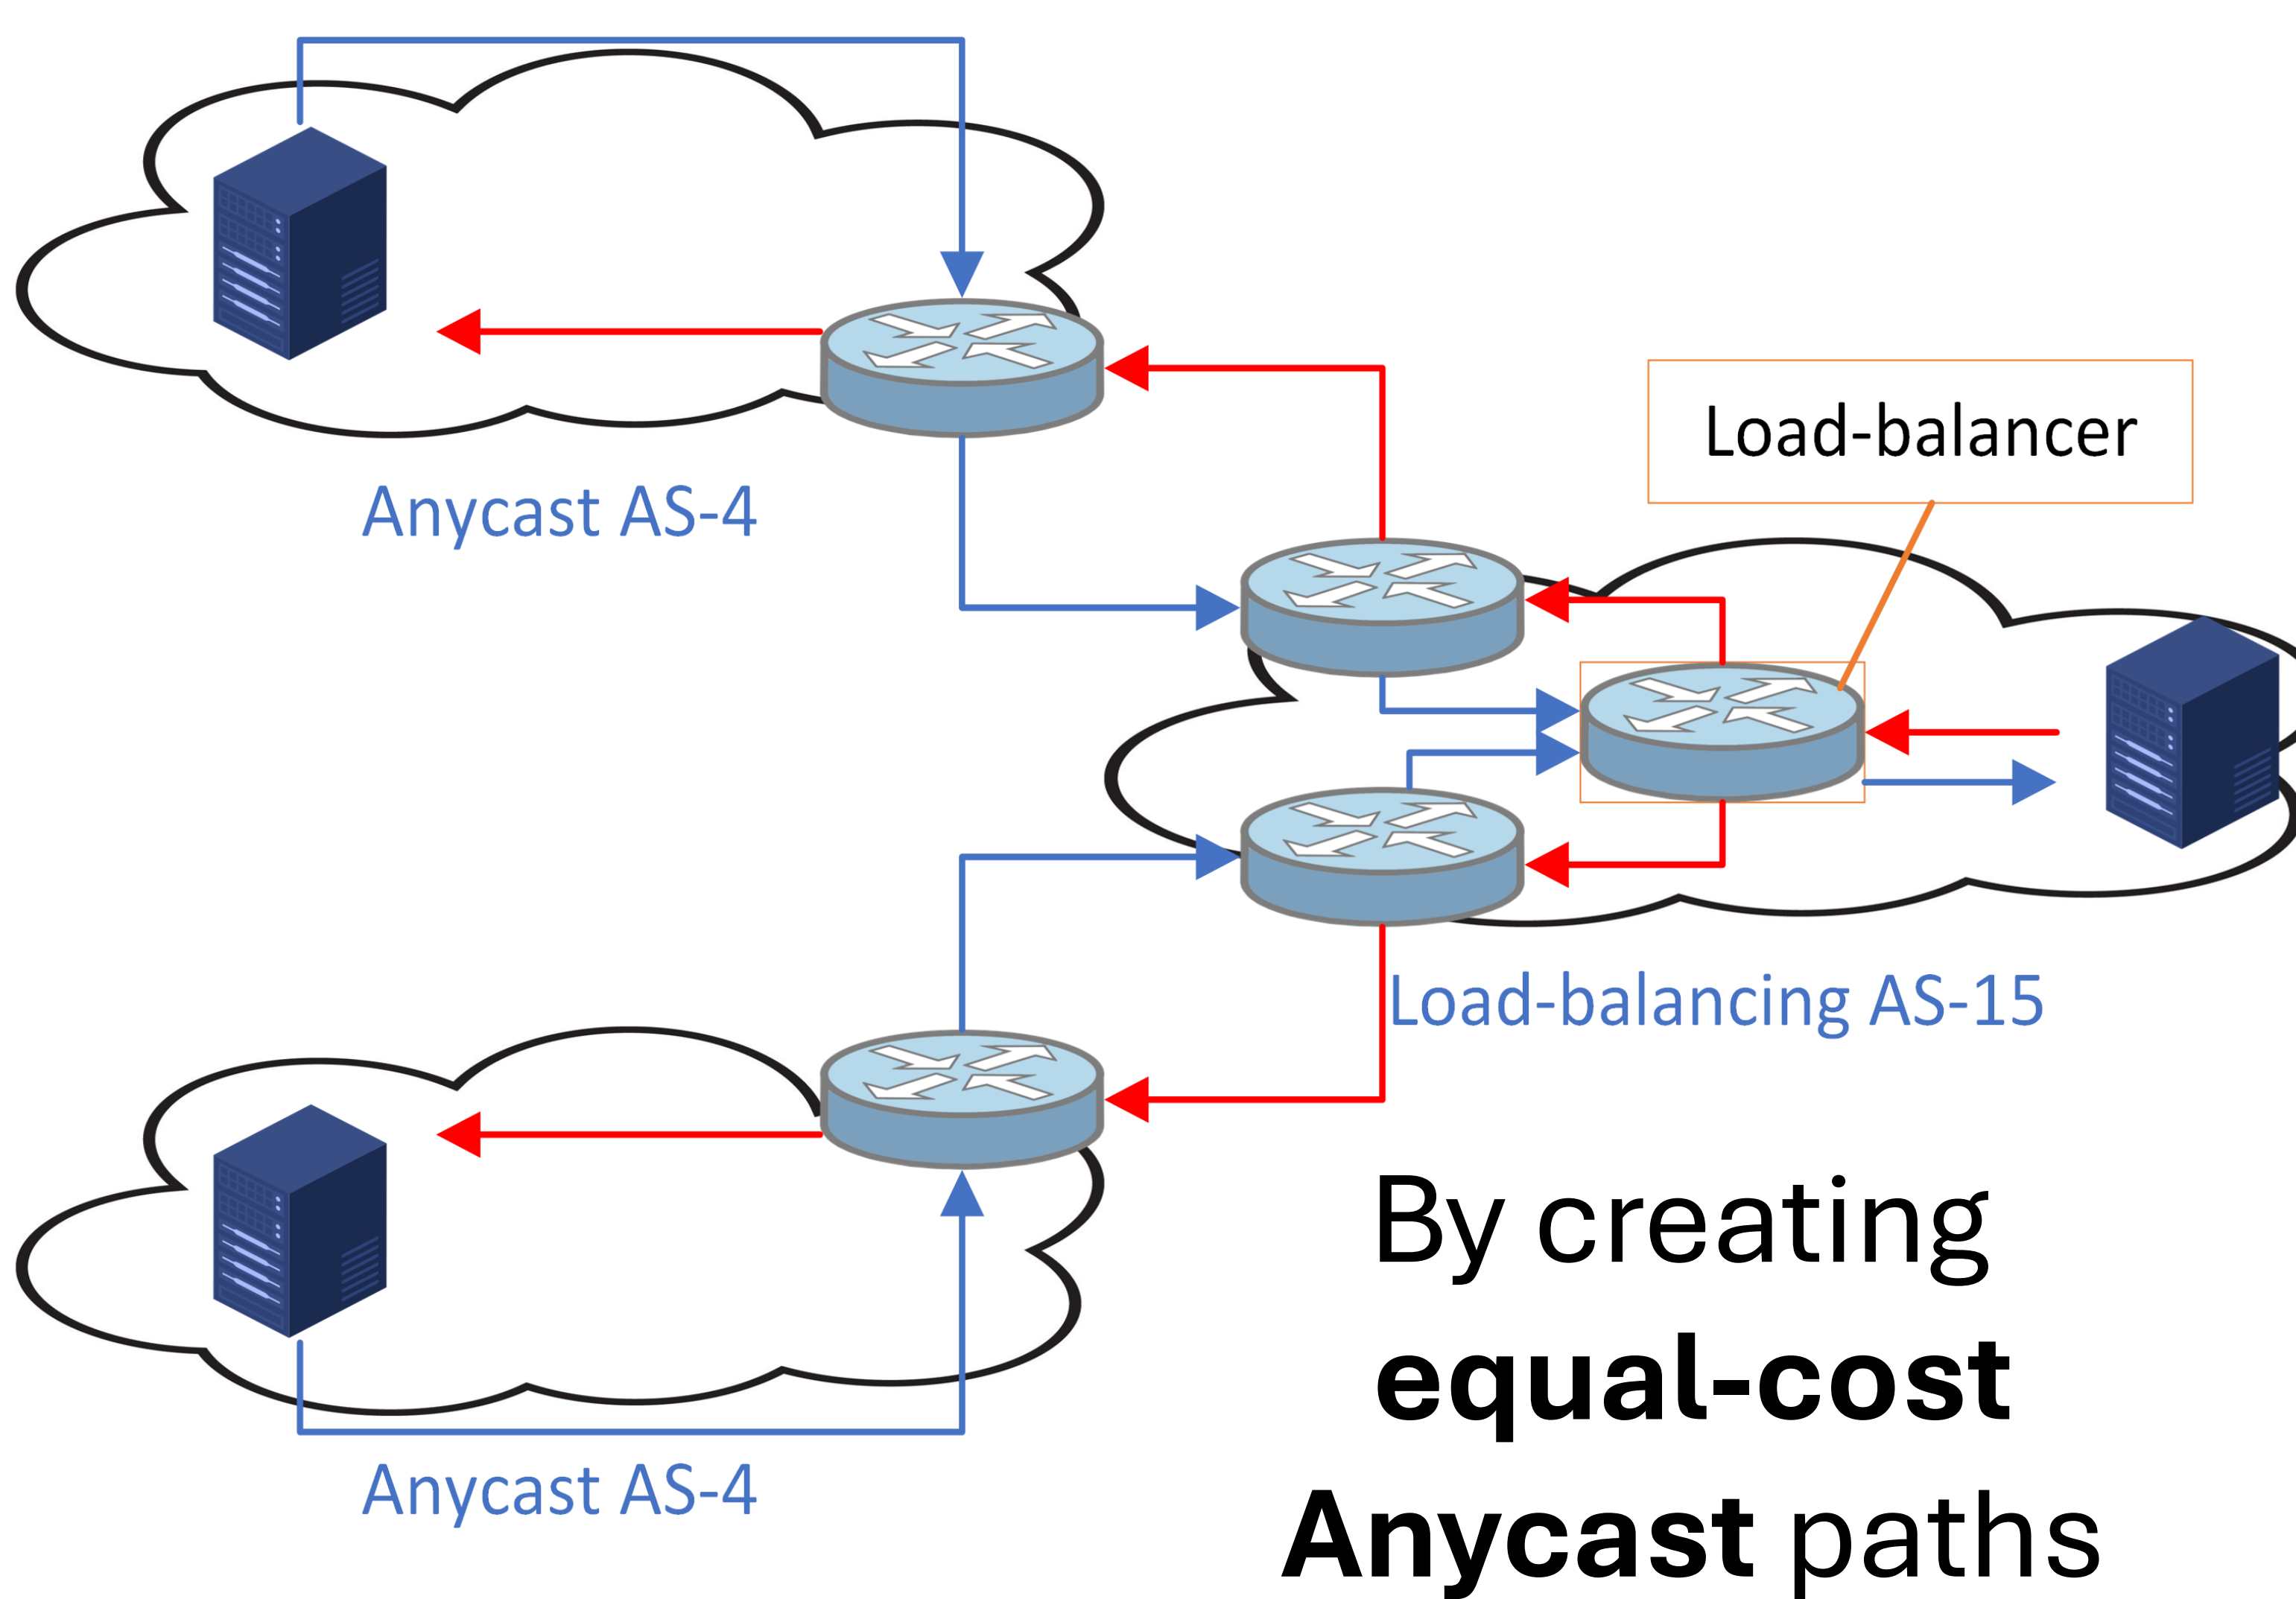

Remi Hendriks (University of Twente)
<remi.hendriks@utwente.nl>

ECMP is widely used to distribute load across the Internet

Goal: Detecting ECMP at Internet scale

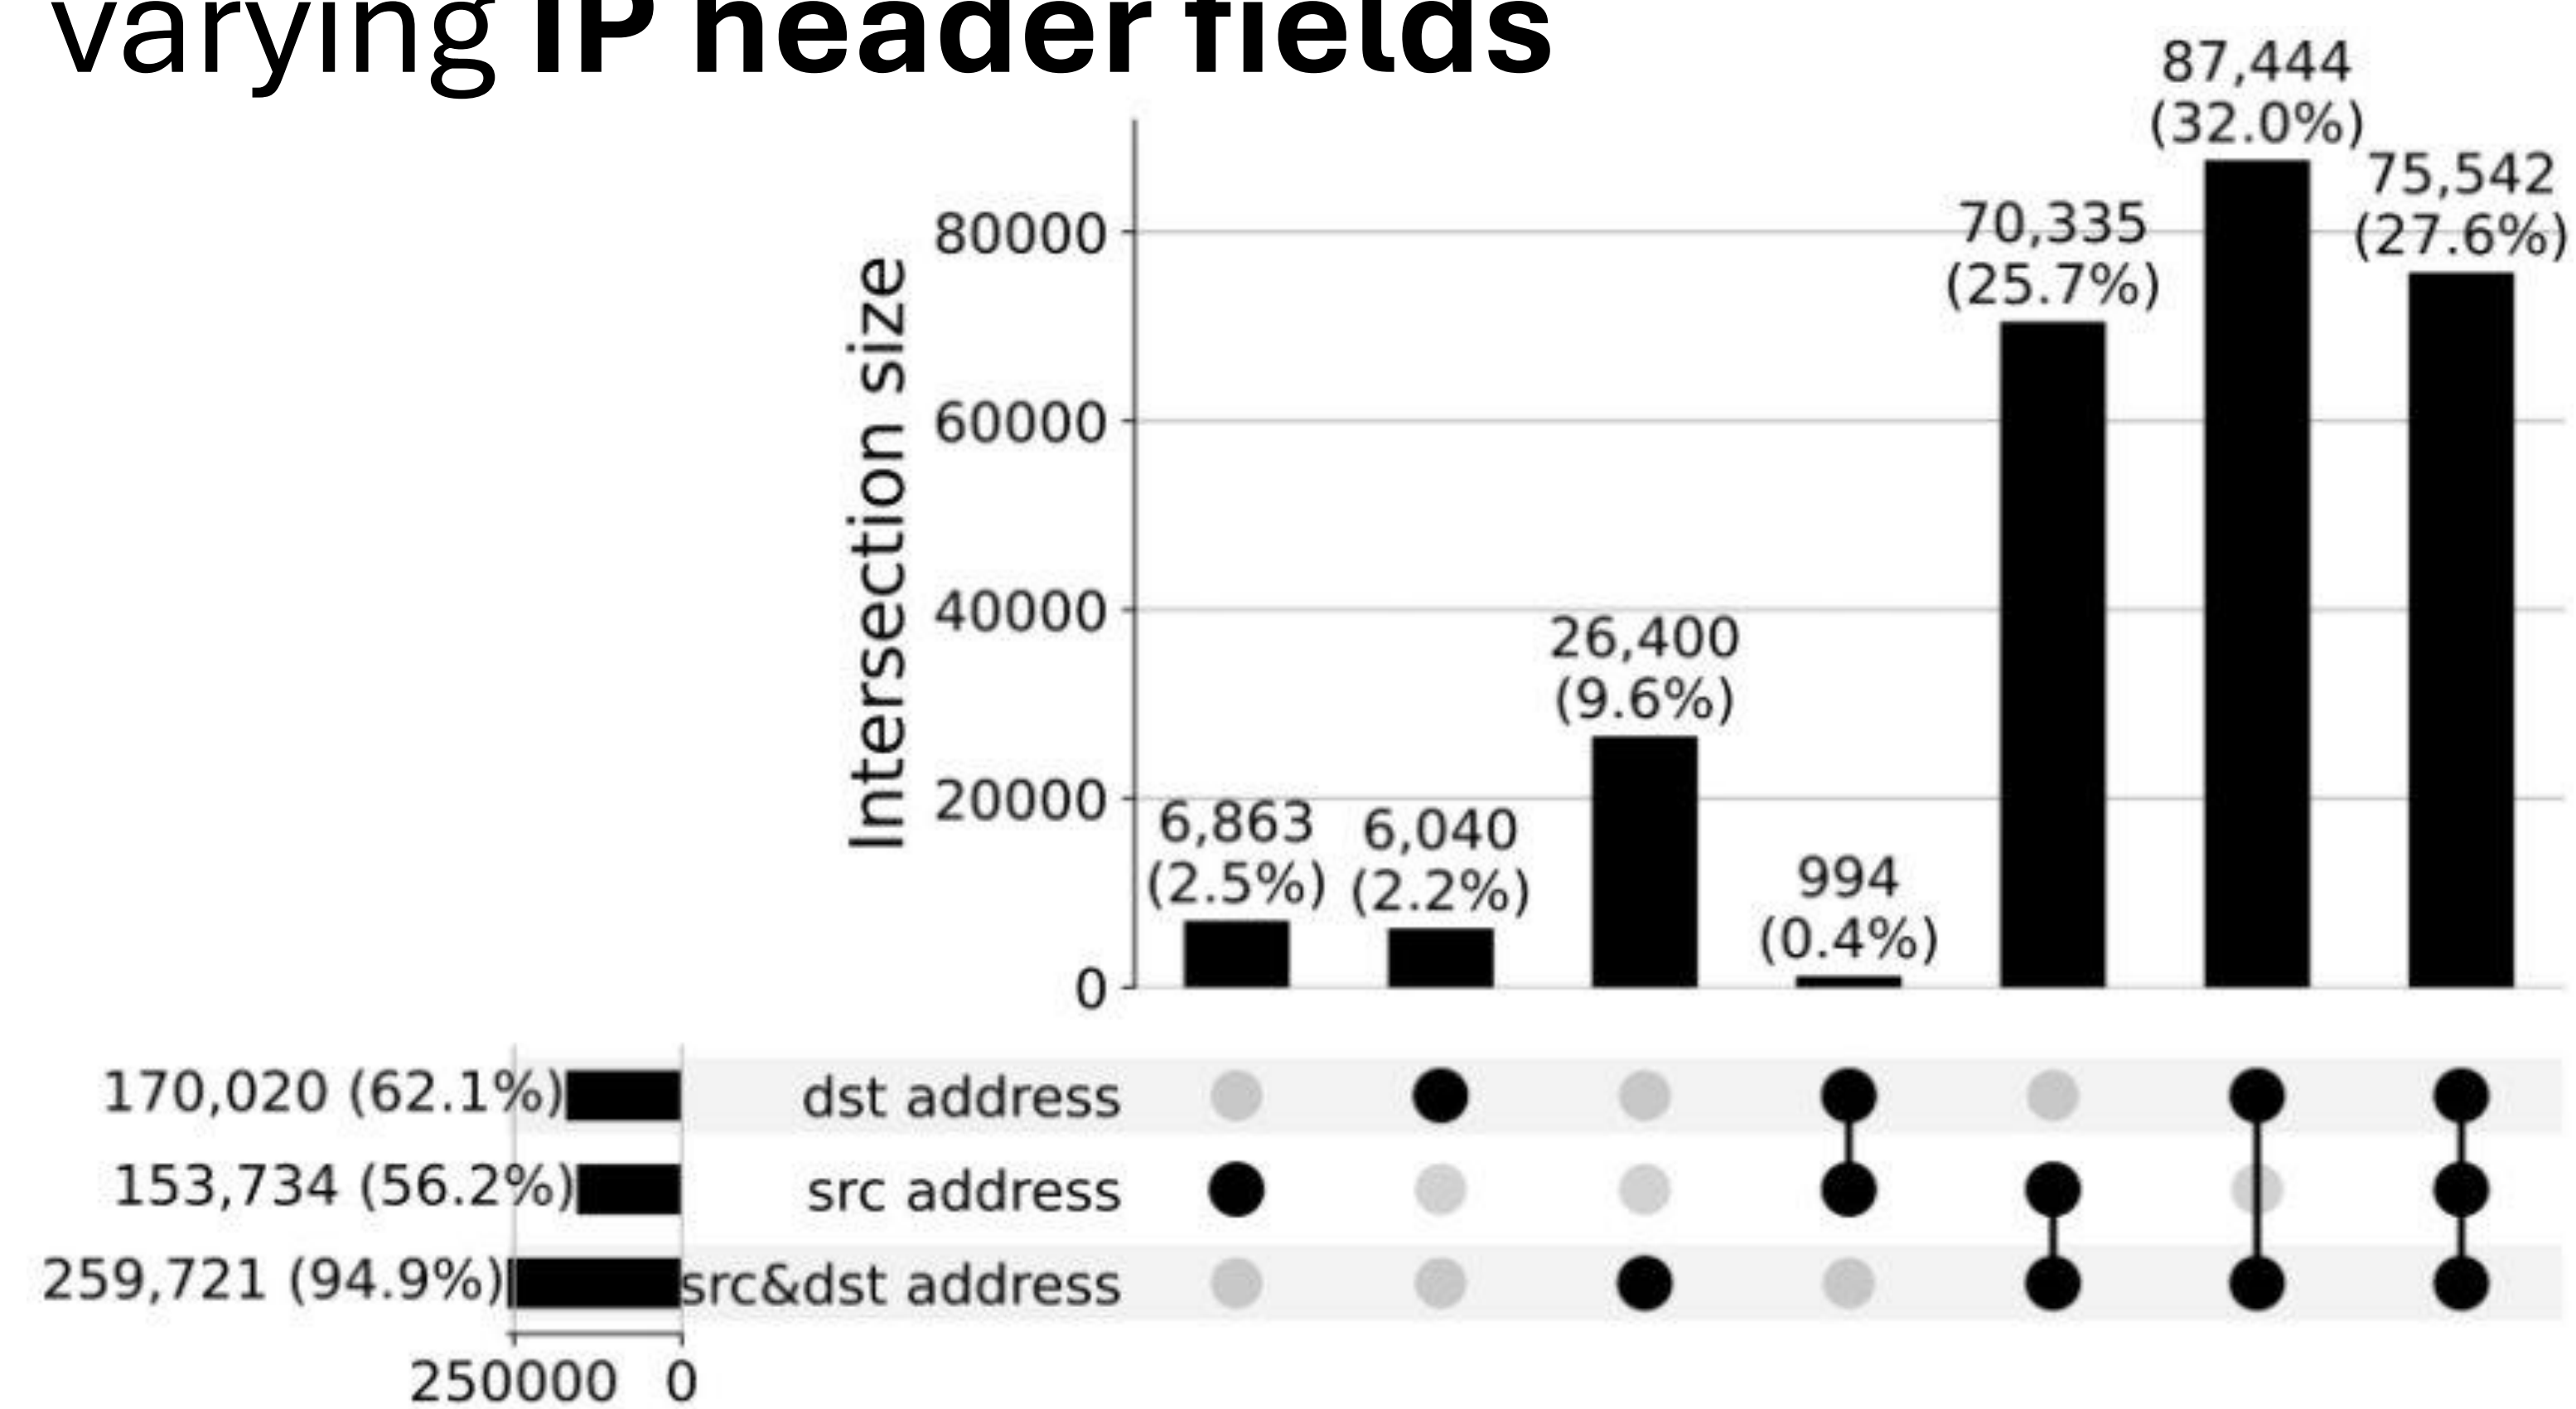

Achieved with a novel methodology

Unveiling ECMP with Anycast

ECMP is widely adopted

Triggering **ECMP** decisions by varying IP header fields

Preliminary promising results and future steps
